INDEPENDENT AUDITORS' REPORT

December 10, 2007

Honorable Mayor and City Commissioners Kentwood, Michigan

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Kentwood, Michigan, as of and for the year ended June 30, 2007 which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City of Kentwood, Michigan's management. Our responsibility is to express opinions on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinions.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Kentwood, Michigan as of June 30, 2007, and the respective changes in financial position and cash flows, where applicable, thereof and the respective budgetary comparison for the general fund and each major special revenue fund for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated December 10, 2007, on our consideration of the City of Kentwood's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards*, and should be considered in assessing the results of our audit.

The Management's Discussion and Analysis on pages 3-14 and the pension information on pages 48-49 are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the City of Kentwood's basic financial statements. The combining and individual fund financial statements and schedules and the continuing disclosure filing are presented for purposes of additional analysis and are not a required part of the City of Kentwood's basic financial statements. The combining and individual fund financial statements and schedules have been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, are fairly presented, in all material respects, in relation to the basic financial statements taken as a whole. The continuing disclosure filing has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on it.

Rehmann Lobson

MANAGEMENT'S DISCUSSION AND ANALYSIS

Management's Discussion and Analysis

As management of the City of Kentwood, we offer readers of the City of Kentwood financial statements this narrative overview and analysis of the financial activities of the City of Kentwood for the fiscal year ended June 30, 2007. We encourage readers to consider the information presented here in conjunction with additional information that is furnished in the financial statements and notes to the financial statements.

Financial Highlights

- 2007 was a year of continued capital investment for the City. Projects included:
- Continuation of water and sewer system capital improvements using proceeds from the general obligation limited tax bonds sold on March 2, 2005;
- Commencement of engineering and right-of-way acquisition for the improvement of Kalamazoo Avenue Phase I (from 52nd Street to 60th Street).

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the City of Kentwood financial statements. The City of Kentwood basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Government-wide financial statements. The *government-wide financial statements* are designed to provide readers with a broad overview of the City of Kentwood finances, in a manner similar to a private-sector business.

The *statement of net assets* presents information on all of the City of Kentwood assets and liabilities, with the difference between the two reported as *net assets*. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the City is improving or deteriorating.

The *statement of activities* presents information showing how the government's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, *regardless of the timing of related cash* flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g., earned but unused vacation leave).

Both of the government-wide financial statements distinguish functions of the City of Kentwood that are principally supported by taxes and intergovernmental revenues (*governmental activities*) or from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*). The governmental activities of the City of Kentwood include district court, public safety, highways and streets, engineering services, public works, culture and recreation, inspections and general administrative services. The business-type activities of the City of Kentwood include water and sewer services.

The government-wide financial statements include not only the City of Kentwood itself (known as the *primary government*), but also the legally separate City of Kentwood Building Authority – a component unit, for which the City of Kentwood is financially accountable. Financial information for this *component unit* is blended with the City debt service fund.

The government-wide financial statements can be found on pages 15-17 of this report.

Fund financial statements. A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The City of Kentwood, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the City of Kentwood can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating a government's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Following both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances are reconciliations to facilitate this comparison between *governmental funds* and *governmental activities*.

The City of Kentwood maintains 18 individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund, Police and Fire Millage Special Revenue Fund, Major Street Special Revenue Fund, Municipal Street Special Revenue Fund and General Projects Capital Projects Fund, each of which are considered to be major funds. Data from the other 13 governmental funds are combined into a single, aggregated presentation. Individual fund data for each of these nonmajor governmental funds is provided in the form of *combining statements* elsewhere in this report.

The City of Kentwood adopts an annual appropriated budget for its general and special revenue funds. Budgetary comparison statements or schedules have been provided herein to demonstrate compliance with those budgets.

The basic governmental fund financial statements can be found on pages 18-27 of this report.

Proprietary funds. The City maintains two different types of proprietary funds. *Enterprise funds* are used to report the same functions presented as *business-type activities* in the government-wide financial statements. The City uses enterprise funds to account for its Water and Sewer operations. *Internal service funds* are an accounting device used to accumulate and allocate costs internally among the City's various functions. The City uses the internal service fund to account for its self-insured dental plan. Because these services predominately benefit governmental rather than business-type functions, they have been included within *governmental activities* in the government-wide financial statements.

Proprietary funds provide the same type of information as the government-wide financial statements, only in more detail The proprietary fund financial statements provide information for the Water and Sewer operations, which is considered to be a major fund of the City.

The basic proprietary fund financial statements can be found on pages 28-30 of this report.

Fiduciary funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the government. Fiduciary funds are *not* reflected in the government-wide financial statements because the resources of those funds are *not* available to support the City of Kentwood's own programs. The accounting used for fiduciary funds is much like that used for proprietary funds.

The basic fiduciary fund financial statements can be found on pages 31 and 32 of this report.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. The notes to the financial statements can be found on pages 33-51 of this report.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain *required supplementary information*. This is limited to this management discussion and analysis and required pension information. Required supplementary information regarding the pension information can be found on pages 52 and 53 of this report.

The combining statements referred to earlier in connection with nonmajor governmental funds and continuing disclosure information are presented immediately following the required supplementary information. Combining and individual fund statements and schedules can be found on pages 54-77 of this report and continuing disclosure information can be found on pages 80-88.

Government-wide Financial Analysis

As noted earlier, net assets may serve over time as a useful indicator of a government's financial position. In the case of the City of Kentwood, assets exceeded liabilities by \$93,698,480 at the close of the most recent fiscal year.

By far the largest portion of the City of Kentwood's net assets reflects its investment in capital assets (e.g., land, buildings, vehicles, equipment and infrastructure), less any related debt used to acquire those assets that is still outstanding. The City of Kentwood uses these capital assets to provide services to citizens; consequently, these assets are *not* available for future spending. Although the City of Kentwood investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

City of Kentwood Net Assets

Governmental activities. Governmental activities increased the City's net assets by \$1,593,238. Key elements of this increase are as follows:

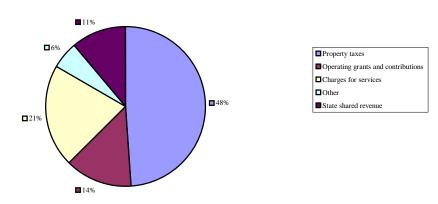

- The timing difference between construction of capital assets and depreciation of the assets over their estimated useful lives.
- A one-time capital cost contribution of \$1,095,800 from Kent County Road Commission toward Kalamazoo Avenue road improvements.

Expenses and Program Revenues - Governmental Activities

Revenues by Source - Governmental Activities

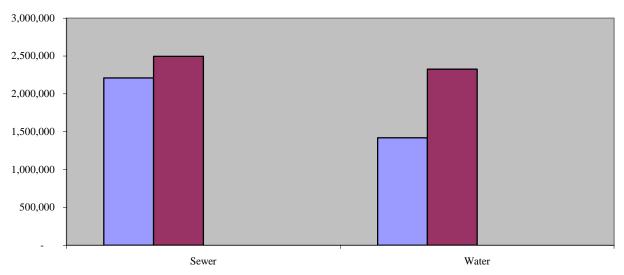

Business-type activities. Business-type activities increased the City's net assets by \$639,602. The key element of this increase was as follows:

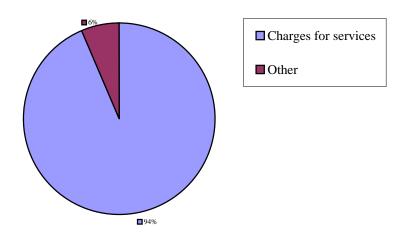

• A decrease in contractual services expenses of \$587,817 due to rate and consumption decreases.

Expenses and Program Revenues - Business-type Activities

Revenues by Source - Business-type Activities

Financial Analysis of the Government's Funds

As noted earlier, the City of Kentwood uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental funds. The focus of the City of Kentwood governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the City of Kentwood financing requirements. In particular, unreserved fund balance may serve as a useful measure of a government's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the City of Kentwood's governmental funds reported combined ending fund balance of \$45,649,608, a decrease of \$233,764 compared with prior year. This decrease was the result of continued use of Police and Fire Millage resources, street construction (in the Major and Local Street Funds), and drain maintenance (in the Drain Fund), which was largely offset by accumulation of assets for future costs in the Municipal Street, Parks, Landfill Remediation, Post Employment Benefits, Property and Building, DPW Equipment and Fire Equipment Funds.

The general fund is the chief operating fund of the City of Kentwood. At the end of the current fiscal year, unreserved fund balance of the general fund was \$4,546,060 while total fund balance reached \$5,062,011. As a measure of the general fund's liquidity, it may be useful to compare both unreserved fund balance and total fund balance to total fund expenditures. Unreserved fund balance represents 19 percent of total general fund expenditures, while total fund balance represents 21 percent of that same amount.

The fund balance of the City of Kentwood's general fund increased by \$23,593 during the current fiscal year.

Proprietary funds. The City of Kentwood's proprietary funds provide the same type of information found in the government-wide financial statements, but in more detail.

Unrestricted net assets of the water and sewer funds at the end of the year amounted to \$3,457,591 and \$2,618,399, respectively. The total changes in net assets for these funds were an increase of \$558,542 and \$81,060, respectively. Other factors concerning the finances of these two funds have already been addressed in the discussion of the City of Kentwood's business-type activities.

General Fund Budgetary Highlights

- The General Fund budget was not amended during the fiscal year ended June 30, 2007.
- General Fund expenditure budget to actual variances are due to several factors including staffing vacancies (Information Technology, Planning and Zoning, Fire, and Inspections Departments); changes in employee benefits costs that were less than budgeted (all departments with personnel); variations in contractual services and supplies needed (Administrative, Assessments, Information Technology, Elections, Police, Public Works, District Court, and Recreation Departments); and changes in customer utilization of activities (Recreation Department)...

Capital Asset and Debt Administration

Capital assets. The City of Kentwood's investment in capital assets for its governmental and business-type activities as of June 30, 2007, amounts to \$54,863,376 (net of accumulated depreciation). This investment in capital assets includes land, buildings, system improvements, machinery and equipment, park facilities, roads, highways, and bridges. The total net increase in the City of Kentwood's investment in capital assets for the current fiscal year was \$707,771.

Major capital asset events during the current fiscal year included the following:

• Completion of water system improvements, continuation of sewer system improvements, and continuation/commencement of street improvements.

City of Kentwood Capital Assets

(net of depreciation)

	Governmental Activities	Business- type Activities	Total
Land	\$ 2,275,360	\$ 60,949	\$ 2,336,309
Construction in progress	2,533,843	-	2,533,843
Building, equipment and infrastructure	42,086,319	7,906,905	49,993,224
Total	\$46,895,522	\$7,967,854	\$54,863,376

Additional information on the City of Kentwood capital assets can be found in Note 5 on pages 45 and 46 of this report.

Long-term debt.

City of Kentwood Outstanding Obligations

	Governmental <u>Activities</u>	Business- Activitie		Total
General obligation bonds	\$19,745,000	\$	-	\$19,745,000
Other obligations	2,536,814			2,536,814
Total	\$22,281,814	\$		\$22,281,814

During the year the City paid \$1,220,000 of principal on bonds outstanding at July 1, 2006.

As of the most recent rating on March 2, 2005, the City of Kentwood has a AA rating from both Standard & Poor's and Fitch.

State statutes limit the amount of general obligation debt a government entity may issue to 10% of the entity's total State Equalized Value. At June 30, 2007, the debt limitation for the City of Kentwood was \$221,951,470; the City's debt outstanding, net of \$4,455,000 of exempt self-supporting debt, was \$15,290,000, leaving a legal debt margin of \$206,661,470.

Additional information on the City of Kentwood long-term obligations can be found in Note 6 on page 47 of this report.

Economic Factors and Next Year's Budgets and Rates

Revenues

Property Taxes – The General Fund's budgeted property tax, its largest revenue source, is projected to increase 3.4%. The increase in taxable value of existing property, not affected by transfer of ownership or construction of additions, was limited by the Consumer Price Index of 3.7%. The difference between the percentages was the result of construction, ownership transfers, personal property acquisitions and property value changes. The millage rate used to calculate tax billings changed from the prior year, based on the millage shift approved by voters on August 8, 2006.

State Shared Revenue – The General Fund's budgeted state shared revenue, its second largest revenue source, when compared to the FY 2007 budget, is projected to decrease by \$108,700, or 3.14%. The FY 2008 budget includes state shared revenue calculated using current estimates provided by the State of Michigan, which includes \$263,267 categorized as statutory revenue sharing, reduced by 10% of the State-provided statutory revenue sharing amount in anticipation of further reductions.

Transfer from Other Funds – This revenue was first budgeted in FY 2000 with the change to collect all of the police and fire millage in the Police and Fire Millage Fund. The amount transferred is calculated based on the Police and Fire Department budgets reduced by the contribution (\$4,928,400) the City was making toward police and fire operations at the time the April 1999 millage increase was adopted.

Expenditures

Although the General Fund expenditures are budgeted to increase 1.81%, additional factors were considered in the preparation of the budget, as follows:

Compensation and employee benefits for City employees are estimated and included in the FY 2008 budget using provisions in completed collective bargaining agreements, and based on potential contract changes for unsettled collective bargaining agreements. Two of the City's collective bargaining agreements are settled for FY 2008. Negotiations with two of the four employee bargaining units commenced during FY 2007, with both contracts expiring on June 30, 2007, and were settled after adoption of the FY 2008 budget.

- Staffing changes (a net decrease of 2.30 full-time equivalents) have been included in the budget.
- The costs of pension and other post employment benefits have been included in the FY 2008 budget. The City funds these benefits based on actuarial valuations, rather than on a "pay-as-you-go" basis.
- The funding of the City's capital needs, through transfers to the Property and Building Fund and Fire Equipment Fund, is included in the FY 2008 budget. The amount of transfer has fluctuated from year to year based upon availability of resources at the end of each year. The FY 2007 budget included \$865,000 for this purpose, while the amount budgeted for FY 2008 is \$695,000, which will be available for capital needs and/or use in future fiscal years to balance the General Fund budget.

Requests for Information

This financial report is designed to provide a general overview of the City of Kentwood finances for all those with an interest in the government's finances. Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to Mr. Thomas H. Chase, Finance Director, City of Kentwood, P.O. Box 8848, Kentwood, MI 49518-8848.

Reconciliation of Fund Balances on the Balance Sheet for Governmental Funds to Net Assets of Governmental Activities on the Statement of Net Assets

June 30, 2007

Fund balances - total governmental funds	\$ 45,649,608
Amounts reported for governmental activities in the statement of net assets are different because:	
Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds.	
Add - capital assets (net)	46,895,522
Certain assets, such as special assessments receivable, are not due and receivable in the current period and therefore are offset with deferred revenue in the funds.	
Add - deferred special assessments receivable	9,416,351
Add - deferred delinquent personal property taxes receivable	166,148
Certain liabilities, such as bonds payable, are not due and payable in the current period and therefore are not reported in the funds.	
Deduct - compensated absences payable	(1,208,280)
Deduct - landfill clean up and other costs	(1,328,534)
Deduct - bonds payable	(19,745,000)
Deduct - accrued interest on bonds payable	(191,179)
Net assets of governmental activities	\$ 79,654,636

Reconciliation of the Statement of Revenues, Expenditures and Changes in Fund Balances of Governmental Funds to the Statement of Activities

For the Year Ended June 30, 2007

Net change in fund balances - total governmental funds	\$ (233,764)
Amounts reported for <i>governmental activities</i> in the statement of activities are different because:	
Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense.	
Add - capital outlay Deduct - depreciation expense Deduct - proceeds from sale of capital assets Add - gain on disposal of capital assets	4,534,454 (3,358,106) (49,094) 45,877
Special assessments and personal property taxes receivable are long-term in nature and are collectible over several years. However the current receipts are reflected as revenues on the fund statements.	
Deduct - decrease in special assessments receivable Deduct - decrease in personal property taxes receivable	(151,530) (372,728)
Bond proceeds provide current financial resources to governmental funds in the period issued, but issuing bonds increases long-term liabilities in the statement of net assets. Repayment of bond principal is an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the statement of net assets.	
Add - principal payments on long-term liabilities Deduct - change in other long-term liabilities	1,220,000 (11,334)
Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in the funds.	
Deduct - increase in compensated absences Add - decrease in accrued interest payable	(39,950) 9,413

The accompanying notes are an integral part of these financial statements.

Change in net assets of governmental activities

NOTES TO FINANCIAL STATEMENTS

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The City of Kentwood, Michigan (the "City"), was incorporated in 1967 and operates under an elected Mayor-Commission form of government. The City provides the following services: public safety (police and fire), highways and streets, sanitation, culture and recreation, public improvements, planning and zoning, water and sewer and general government services.

The financial statements of the City have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to government units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the City's accounting policies are described below.

The Reporting Entity

The accompanying financial statements present the City (the primary government) and its component unit, an entity for which the government is considered to be financially accountable. Blended component units, although legally separate entities, are, in substance, part of the City's operations, so data from these units are combined with data of the primary government. Discretely presented component units, on the other hand, are reported in a separate column in the government-wide financial statements to emphasize they are legally separate from the City. The City has no discretely presented component units.

Blended Component Unit

Building Authority – The Building Authority is governed by a Board that is appointed by the Kentwood City Commission. Its sole purpose is to finance and construct the City's public buildings. It is reported in the appropriate fund category of Debt Service. A separate report is not prepared for the Building Authority.

Funds with Other Year Ends

The financial statements of the Pension Trust Defined Benefit Fund have been included in the accompanying 2007 financial statements using the fiscal year ended December 31, 2006.

Government-wide and Fund Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the nonfiduciary activities of the primary government and its component unit. For the most part, the effect of interfund activity has been removed from these statements. Governmental activities, which normally are supported by taxes and intergovernmental revenues, are reported separately from business-type activities, which rely to a significant extent on fees and charges for support.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment. Indirect expenses are charged based upon a City-wide cost allocation plan which allocates costs based upon the number of full time equivalents, number of transactions, and other pertinent information. Program revenues include (1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and (2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Taxes and other items not properly included among program revenues are reported instead as general revenues.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, even though the latter are excluded from the government-wide financial statements. Major individual governmental funds and major individual enterprise funds are reported as separate columns in the fund financial statements.

Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting, as are the proprietary fund and fiduciary fund financial statements, except for agency funds, which do not have a measurement focus. Revenues are recorded when earned and expenses are recorded when liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. After March 1 of the following year, the County pays the City for any outstanding property (excluding personal property) taxes of that date. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. For this purpose, the government considers property tax revenues to be available if they are collected within 60 days of the end of the current fiscal period. Special assessment revenue is recognized if collected within 12 months of year-end. Grant revenues are recorded when all eligibility requirements have been met. Expenditures generally are recorded when a liability is incurred, as under accrual accounting. However, debt service, landfill remediation and compensated absences expenditures are recorded only when payment is due.

Property taxes, intergovernmental revenue, charges for services and interest associated with the current fiscal period are all considered to be susceptible to accrual and so have been recognized as revenues of the current fiscal period. That portion of special assessments expected to be collected within the next 12 months is considered to be susceptible to accrual and recorded as revenue. All other revenue items are considered to be measurable and available only when cash is received by the City.

The City reports the following major governmental funds:

The *General Fund* is the City's primary operating fund. It accounts for all financial resources of the general government, except those required to be accounted for in another fund.

The *Police and Fire Millage Fund* accounts for funds generated by property tax collections specifically intended for police and fire protection.

The *Major Street Fund* accounts for funds specifically intended for the maintenance and construction of major streets. Financing is provided from Public Act 51 State Shared Gas and Weight Tax and miscellaneous service revenues.

The *Municipal Street Fund* accounts for funds specifically intended for the maintenance and construction of streets designated as municipal state aid streets.

The General Projects Capital Projects Fund accounts for funds accumulated from special assessments for construction projects.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

The City reports the following major proprietary funds:

The *Water Fund* accounts for funds specifically intended for the operation, maintenance and capital improvements of the water supply system and retirement of revenue bonds. Financing is provided by user charges and contributions by other funds, municipalities and customers.

The *Sewer Fund* accounts for funds specifically intended for the operation, maintenance and capital improvements of the sewage disposal system, and retirement of revenue bonds. Financing is provided by user charges and contributions by other funds, municipalities and customers.

Additionally, the City reports the following fund types:

Special Revenue Funds are used to account for revenue from specific revenue sources (other than major capital projects) and related expenditures which are restricted for specific purposes by administrative action or law.

The Debt Service Fund accounts for the resources accumulated and payments made for principal and interest on long-term general obligation debt of governmental funds.

The Capital Projects Fund accounts for the revenue and expenditures for significant construction projects.

The *Internal Service Fund* accounts for the City's activities in the self-insured dental plan and charges costs provided to City departments on a cost-reimbursement basis.

The *Pension Trust Fund* is used to record the activities of the City's defined benefit pension plan.

The *Private Purpose Trust Fund* is used to record the activity of collecting special assessments which are payable to other entities and which may revert to the City based on time limits established in various agreements.

The *Agency Fund* is used to account for assets held by the City in a trustee or agency capacity on behalf of outside parties, including other governments.

Private-sector standards of accounting and financial reporting issued prior to December 1, 1989, generally are followed in both the government-wide and proprietary fund financial statements to the extent that those standards do not conflict with or contradict guidance of the Governmental Accounting Standards Board. Governments also have the option of following subsequent private-sector guidance for their business-type activities and enterprise funds, subject to this same limitation. The government has elected not to follow subsequent private-sector guidance.

As a general rule the effect of interfund activity has been eliminated from the government-wide financial statements. Exceptions to this general rule are transactions where the amounts are reasonably equivalent in value to the interfund services provided and other charges between the government's water and sewer function and various other functions of the government. Elimination of these charges would distort the direct costs and program revenues reported for the various functions concerned.

Proprietary funds distinguish *operating* revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues are charges for water and sewer services. Operating expenses for the enterprise fund include depreciation on capital assets and payments for services, wages and supplies. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

When both restricted and unrestricted resources are available for use, it is the City's policy to use restricted resources first, then unrestricted resources as they are needed.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Receivables and Payables

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "due from other funds" or "due to other funds" on the balance sheet.

Any residual balances outstanding between the governmental activities and business-type activity are reported in the government-wide financial statements as "internal balances."

Accounts receivable is shown net of allowance for estimated uncollectibles. \$207,400 of the loans receivable and \$9,416,351 of special assessments receivable are not expected to be collected within one year.

Inventories and Prepaid Items

Inventories are valued at cost on the first-in/first-out (FIFO) method. Inventories are recorded as expenditures when consumed rather than when purchased.

Payments made to vendors for services that will benefit periods beyond a fund's fiscal year-end are recorded as prepaid items in both government-wide and fund financial statements.

Budgets and Budgetary Accounting

General Budgetary Policies – The Mayor is responsible for submitting the proposed operating budget for the following fiscal year to the City Commission. The City Commission, during its review, holds public hearings to obtain taxpayer comments. The budget is legally enacted through passage of a resolution.

Budget Transfers and Amendments – The City Commission authorizes all budgetary transfers. Supplemental appropriations, when required to provide for additional expenditures, are matched by additional anticipated revenues or an appropriation of available fund balance and must be approved by the City Commission. All budget amendments are approved by the City Commission.

Budgetary Basis of Accounting – Formal budgetary integration is employed as a management control device during the year for the General and Special Revenue Funds. The budgets are adopted on a modified accrual basis consistent with generally accepted accounting principles (GAAP).

Appropriations are authorized by resolution at the department level for the General Fund and at the fund level for Special Revenue Funds. These are the legal levels of budgetary control. Administrative control is maintained through the establishment of more detailed line-item budgets. All unexpended appropriations lapse at year-end.

Encumbrances

Encumbrance accounting, under which purchase orders, contracts and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is not a legal requirement of the City and is not employed.

Cash and Pooled Investments

For purposes of the statement of cash flows, the City considers all assets held in the cash and investment pool to be cash equivalents because the investments are not identifiable to specific funds and the assets can be withdrawn at anytime, similar to a demand deposit account.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Investments

Investments are stated at fair value. For fair value, securities traded on a national exchange are valued at the last reported sales price. The net investment income reported includes the change in fair value of the investments from the beginning of the year to the end of the year.

Statutes authorize the City to invest in the following:

- Bonds, securities, other obligations and repurchase agreements of the United States, or an agency or instrumentality of the United States.
- Certificates of deposit, savings accounts, deposit accounts, or depository receipts of a qualified financial institution.
- Commercial paper rated at the time of purchase within the 2 highest classifications established by not less than 2 standard rating services and that matures not more than 270 days after the date of purchase.
- Bankers acceptances of United States banks.
- Obligations of the State of Michigan and its political subdivisions that, at the time of purchase are rated as investment grade by at least one standard rating service.
- Mutual funds registered under the Investment Company Act of 1940 with the authority to purchase only investment vehicles that are legal for direct investment by a public corporation.
- External investment pools as authorized by Public Act 20 as amended through December 31, 1997.

The City's defined benefit retirement system's investments are held in trust by two local banks. Michigan compiled law authorizes the system to invest in stocks, bonds, certificates of deposits and authority of other investments.

Capital Assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, sidewalks, and similar items), are reported in the governmental activities column in the government-wide financial statements. The capitalization threshold ranges from \$10,000 - \$25,000. Capital assets are defined by the government as assets with an initial, individual cost of more than \$10,000 (amount not rounded) and an estimated useful life in excess of three years. Such assets are valued at cost where historical records are available and at an estimated historical cost where no historical records exist. Donated capital assets are valued at their estimated fair market value on the date received. Infrastructure assets are recorded as capital expenditures at the time of purchase in the fund financial statements (statement of governmental fund revenue, expenditures and changes in fund balance) and are subsequently capitalized on the government-wide statements

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the related capital assets, as applicable.

No interest expense has been incurred or capitalized on capital assets reported in governmental funds.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Depreciation is computed using the straight-line method over the estimated useful lives of the related assets as follows:

	Years
Buildings, equipment, water mains, meters, storage tanks and sewer mains	50
Storage tank improvements	15
Transportation and other equipment	4-20
Public domain infrastructure	20-45

Property Taxes

City summer property taxes are attached as an enforceable lien on property as of July 1st. Taxes are levied July 1 and are due without penalty on or before August 20. These summer tax bills include the City's own property taxes and taxes billed on behalf of other governmental entities. Real property taxes not collected as of March 1 are turned over to Kent County for collection. Collection of delinquent personal property taxes remains the responsibility of the City Treasurer.

The City also acts as a collection agent for various governments for winter property taxes. Taxes collected on behalf of other governmental entities are paid to them periodically and are accounted for in an agency fund.

Risk Management and Benefits

The City is a member of the Michigan Municipal League Workers' Compensation Fund. Premiums from participants of the fund provide coverage to pay claims, administrative expenses and to purchase reinsurance to protect the fund and members against exceptionally large losses. No deductible is required for City claims.

The City is a member of the Michigan Municipal League Liability and Property Pool. Premiums from participants of the fund are arrived at through underwriting procedures administered by the Meadowbrook Insurance Group. The claims, administrative expenses and reinsurance are provided for by the premiums collected. Various deductibles are maintained to place the responsibility for small charges with the insured. Deductible examples: liability, \$5,000; blanket real and personal property including buildings, personal property and property in the open, \$5,000; and electronic data processing equipment, \$1,000.

The City has transferred the risk of loss associated with employee health care by purchasing health insurance from commercial insurance carriers. On October 1, 2006, the City established a self-funded dental plan using a third party administrator for claims processing.

Settled claims have not exceeded insurance coverage in any of the past three years. There have been no significant reductions in insurance coverage from the past year.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Deferred Revenue

Governmental funds report *deferred revenue* in connection with receivables for revenues that are not considered to be available to liquidate liabilities of the current period or for resources that have been received, but not yet earned. At the end of the current fiscal year, the various components of *deferred revenue* reported in the governmental funds were as follows:

Escrows for recreation department purposes	\$ 90,070
Litigation settlement (General Fund)	20,199
Fire Prevention (General Fund)	3,196
City's portion of delinquent personal property taxes	
receivable (General Fund)	166,148
Special assessments	9,416,351
	\$9,695,964

Compensated Absences

City employees are granted vacation days in varying amounts based on length of service. Employees must use earned vacation time within 12 months from their last anniversary date with a maximum carryover of 160-218.25 hours. Upon termination, discharge, retirement or death, employees are paid for unused vacation time at the current rate. Sick leave is accumulated at the rate of from 8 to 12 hours per month of employment depending on bargaining unit. Unused accumulated sick leave, up to a maximum of from 90 to 150 days at a rate of from \$1.00 to \$1.50 per day times the years of continuous service, is paid to employees who meet specified years of service and who die, retire or terminate in good standing based on bargaining unit. These liabilities are included on the government-wide financial statements.

2. EXCESS OF EXPENDITURES OVER APPROPRIATIONS IN BUDGETARY FUNDS

During the year ended June 30, 2007 the City incurred expenditures in certain budgeted funds which were in excess of the amounts appropriated, as follows:

	Total Appropriations	Amount of Expenditures	Budget Variance
General Fund			
Administrative	\$1,803,700	\$1,923,289	\$ 119,589
Culture & Recreation - Library	96,100	100,468	4,368
Transfers out	865,000	1,300,000	435,000
DPW Equipment Fund	233,800	243,206	9,406
Street Lighting Fund – Highways & Streets	390,600	414,578	23,978
Local Street Fund – Transfers out	-	242,277	242,277

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

3. DEPOSITS AND INVESTMENTS

The captions on the government-wide and fiduciary fund statements related to deposits and investments, are as follows:

	Governmental Activities	Business-type Activities	Fiduciary Funds	Total
Cash and pooled investments Investments	\$44,772,251	\$5,640,379	\$ 2,243,714 18,248,445	\$52,656,344 18,248,445
Total deposits and investments	\$44,772,251	\$5,640,379	\$20,492,159	\$70,904,789

Cash and investments are composed of the following at year-end:

Total deposits and investments	\$70,904,789
Investments	68,567,534
Petty cash	1,700
Deposits	\$ 2,335,555

Deposits are in two (2) financial institutions located in Michigan.

The City chooses to disclose its investments by specifically identifying each. As of year end, the City had the following investments:

Total	\$ 68,567,534
าบเลา	φ 00,507,554

Investment and Deposit Risk

Interest Rate Risk. State law limits the allowable investments and the maturities of some of the allowable investments as identified in Note 1 (summary of significant accounting policies). The City's investment policy does not have specific limits in excess of state law on investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates. The maturity dates for each investment are identified above for investments held at year end.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Credit Risk. State law limits investments to specific government securities, certificates of deposits and bank accounts with qualified financial institutions, commercial paper with specific maximum maturities and ratings when purchased, bankers acceptances of the City's specific financial institutions, qualified mutual funds and qualified external investment pools as identified in Note 1 (summary of significant accounting policies). The investment policy does not have specific limits in excess of state law on investment credit risk. The ratings for each investment are identified above for investments held at year end with the exception of the Defined Benefit Plan assets, which are reported as of December 31, 2006.

Custodial Credit Risk – Deposits. Custodial credit risk is the risk that in the event of a bank failure, the City's deposits may not be returned. The City minimizes this risk by pre-qualifying the financial institutions, broker/dealers, intermediaries, and advisors to be in compliance with the requirements set forth in the City's investment policy. As of year end, \$2,772,452 of the City's bank balance of \$2,972,452 was exposed to custodial credit risk because it was uninsured and uncollateralized.

Custodial Credit Risk – Investments. For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the City will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The City minimized this risk by pre-qualifying the financial institutions, brokers/dealers, intermediaries and advisors to be in compliance with the requirements set forth in the City's investment policy. Of the above mutual fund investments, the City's custodial credit risk exposure cannot be determined because the mutual funds do not consist of specifically identifiable securities.

Concentration of Credit Risk. State law limits allowable investments but does not limit concentration of credit risk as identified in Note 1 (summary of significant accounting policies). The City's investment policy does not have specific limits in excess of state law on concentration of credit risk. All investments held at year end are reported above with the exception of the Defined Benefit Plan assets which are reported as of December 31, 2006.

4. INTERFUND TRANSACTIONS

Transfers in and out for the year ended June 30, 2007 are as follows:

	Transfers In	Transfers Out
Governmental activities:		
General fund	\$ 8,847,119	\$ 1,300,000
Police and fire millage fund	-	8,801,019
Major street	98,152	-
Municipal street	-	42,138
Nonmajor governmental funds	2,519,388	961,208
Business-type activities:		
Water fund	51,786	192,145
Sewer fund	38,965	258,900
Total	\$11,464,659	\$11,464,659

Transfers are used to: (1) move revenues from the fund that is required to collect them to the fund that is required or allowed to expend them; (2) move receipts restricted to or allowed for debt service from the funds collecting the receipts to the debt service fund as debt service payments become due; and (3) use unrestricted revenues collected in the general fund to finance various programs accounted for in other funds in accordance with budgetary authorizations.

2022-2023	1,395,000	62,033	1,457,033
	\$19,745,000	\$6,089,364	\$25,834,364

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

7. PENSION PLANS

Defined Benefit Plan

The City of Kentwood Employee Pension Plan (Plan) is a single employer defined benefit plan which covers some employees of the City. The Plan is administered by the City with some aspects of plan administration contracted to various specialists. All Employees of the City, exclusive of those participating in the defined contribution plan, who are at least 21 years of age, working more than 1,300 hours and having at least one year of service are eligible to participate in the Plan. A separate financial report for this plan is not issued. Membership of the Plan consisted of the following at January 1, 2007, the date of the latest actuarial valuation:

	104
Active plan members	76
Terminated members not yet receiving benefits	8
Retirees and beneficiaries receiving benefits	20

Benefits partially vest after five years of service and vest 100% after ten years of service. Normal retirement is at age 50 to 60 depending on bargaining unit. However, the participant may elect early or late retirement. Upon ten years of service, a participant is entitled to receive a benefit equal in value to a single life annuity on the participant's life with the annual retirement benefit equal to 2.5% to 2.6% of the participant's average annual compensation (highest five of last ten years compensation) multiplied by the number of years of service, not to exceed Internal Revenue Service 415 limits. The maximum retirement benefit is 75% to 77% of final average compensation. The Plan also provides death benefits as determined by the Plan document. The Plan also provides police and fire participants with duty-related disability benefits as specified by the Plan document.

Summary of Significant Accounting Policies

The financial statements of the City's defined benefit pension plan are prepared using the accrual basis of accounting. Plan member contributions are recognized in the period in which the contributions are due. The City's contributions are recognized when due and a formal commitment to provide the contribution has been made. Benefits and refunds are recognized when due and payable according to the terms of the Plan.

Plan investments are reported at fair value with plan administrative costs being financed by the plan.

Contributions

The City's Plan benefits and contribution requirements were established and may be amended under the authority of the City Commission and under agreements with the City's collective bargaining units representing various classes of employees.

The Plan's funding policy is that employees will contribute a fixed portion of their pay at rates specified in the Plan document, and the employer will contribute any remaining required amounts as determined by an annual actuarial valuation.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Current rates of employee contributions are 4% of compensation for police –supervisory participants, 5% of compensation for police-patrol participants, 4% for firefighter participants, and 3% for participants who are members of Kentwood General Employees Association (KGEA) and the 62-B District Court. The Plan does not permit or require other participant contributions. The Plan also calls for the City to contribute amounts sufficient to fund the Plan in accordance with minimum funding standards of the Internal Revenue Code. There are no long-term contracts for contributions to the Plan. The Plan has no legally required reserves. The annual required contribution for the City during the plan year ended December 31, 2006 was \$800,000.

Net pension obligation – end of the year	\$ -	
Contribution made by the City	800,000	_
Annual required contribution/annual pension cost	800,000	
Net pension obligation – beginning of year	\$ -	

Funding Status and Progress

The annual required contribution was determined as part of an actuarial valuation of the Plan as of January 1, 2007. Significant actuarial assumptions used in determining the annual required contribution include (a) rate of return on the investment of present and future assets of 7.5% per year compounded annually, (b) projected salary increases of 4% per year attributable to inflation, and (c) additional cost-of-living salary increases of 3% per year.

The City's funding policy for periodic employer contributions are at actuarially determined rates that, expressed as percentage of annual covered payroll, are designed to accumulate sufficient assets to pay benefits when due. The normal cost and actuarial accrued liability are determined using an entry age normal actuarial funding method. Unfunded actuarial accrued liabilities are being amortized as a level dollar over an open period of ten years. During the Plan year ended December 31, 2006, contributions totaling \$1,003,374 (\$800,000 employer and \$203,374 employee) were made.

The actuarial value of assets has been determined utilizing as smoothing technique which considers asset projected and market values.

Trend Information

	Plan year ended December 31,	Annual Pension Cost (APC)	Percentage of APC Contributed	Net Pension Obligation
٠	2004	\$870,000	100%	\$ -
	2005	770,000	100%	-
	2006	800,000	100%	-

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

Defined Contribution Plan

The City of Kentwood Defined Contribution Pension Plan provides pension benefits for substantially all employees working more than 1,300 hours per year exclusive of those participating in the City's defined benefit plan. In a defined contribution plan, benefits depend solely on amounts contributed to the plan plus investment earnings.

Employees are eligible to participate immediately upon employment. The City contributes 7-12% of each participant's compensation to the Plan. The City's contributions are partially vested after two years of service and 100% vested after seven years of service. The Plan provisions and contribution amounts were established by City Commission, based on collective bargaining agreements, and may be amended by City Commission. The Plan is administered by the ICMA Retirement Corporation.

The City's total payroll for the year ending June 30, 2007 was approximately \$12,937,300. The City's contribution of approximately \$696,900 was calculated using the employee compensation amount of approximately \$7,913,500. City employees also made pre-tax mandatory contributions to the Plan totaling approximately \$279,400, which was 0-5% of covered payroll.

8. SELF INSURANCE

Beginning in October 2006, the City was self-insured for dental coverage on a pay-as-you-go basis. The self-insurance program is administered by a third party administrator. Dental benefits are paid out of the internal service fund. Changes in the estimated liability are as follows:

	<u>2007</u>
Liability, beginning of year Estimated claims incurred Claim payments	\$ 124,762 (103,462)
Liability, end of year	\$ 21,300

The above liability represents actual known payments made after year-end for claims occurring on or before year-end. No additional, estimated amount is recorded in the government-wide statement of net assets.

9. POST-EMPLOYMENT BENEFITS

In addition to pension benefits, in accordance with the collective bargaining agreements, retirees receive an employer-paid benefit toward health insurance premiums for the retiree and spouse. The retiree benefit amount is determined by multiplying \$12.00 times the employee's years of continuous active service. Upon the death of the employee or spouse, the employer's contribution will be reduced by 25%. The employer's contributions cease when the employee becomes eligible for Medicare benefits. The City has 7 participants that are eligible to receive benefits. The benefits are financed through transfers to a special revenue fund in amounts determined using actuarial calculations. During the fiscal year ended June 30, 2007, the City incurred approximately \$13,000 of post-employment benefit costs.

NOTES TO FINANCIAL STATEMENTS

FOR THE YEAR ENDED JUNE 30, 2007

10. COMMITMENTS, CONTINGENCIES AND SUBSEQUENT EVENTS

Landfill

Paris Township, which later became the City of Kentwood, operated the old Kentwood Landfill from the late 1940's through 1972 at which time Kent County assumed operations until the landfill closed in May 1976. In 1980, the landfill was placed on the U.S. Environmental Protection Agency (EPA) Superfund national priority list of contamination sites. Recent studies of the landfill show that a variety of solvents, inorganic compounds and metals have contaminated groundwater. The EPA has also concluded that leachate, a hazardous liquid which seeps from refuse, might find its way into nearby Plaster Creek if corrective action is not taken.

Kent County and the EPA have negotiated a settlement to clean up the landfill over a 40-year period. On August 6, 1991, the City Commission approved an arrangement with the County whereby the City would be responsible for 20% of the total clean-up costs as a result of its prior operation of the landfill. The current present value estimate of remaining clean-up costs over the next 35 years is \$6,642,671, of which the City would be responsible for \$1,328,534. Expenditures of \$60,303 were incurred for landfill clean-up during fiscal year 2007. Under the plan developed by the EPA, contaminated groundwater and leachate would be pumped out, treated and the soil-and-clay cap, which covers the dump, would be upgraded. Fencing would also be installed around the site.

The City is to cover these costs with a 15 year millage that was approved by voters in November 1994. As of June 30, 2007, the City has accounted for the \$1,328,534 in the government-wide financial statements.

11. LITIGATION

In the normal course of its activities, the City has become a party in various legal actions, including property tax assessment appeals. Management of the City is of the opinion that the outcome of such actions will not have a material effect on the financial position of the City. Amounts reserved for losses related to legal actions have been included as other obligations in the financial statements.

INTERNAL CONTROL AND COMPLIANCE

INDEPENDENT AUDITORS' REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

December 10, 2007

Honorable Mayor and City Commissioners City of Kentwood, Michigan

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Kentwood, Michigan, as of and for the year ended June 30, 2007 and have issued our report thereon dated December 10, 2007. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

In planning and performing our audit, we considered the City of Kentwood's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City of Kentwood's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the City of Kentwood's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles, such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of the internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the City of Kentwood, Michigan's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclose no instances of noncompliance or other matters that are required to be reported under *Government Auditing Standards*.

We noted certain matters that we reported to management of the City of Kentwood in a separate letter dated December 10, 2007.

This report is intended solely for the information and use of the management, the City Commission, federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Tax Abatement

The City's SEV and Taxable Value does not include the value of certain facilities which have temporarily been removed from the Ad Valorem Tax Roll pursuant to Act 198 (the "Act"). The Act was designed to provide a stimulus in the form of significant tax incentives to industry and commercial enterprises to renovate and expand aging facilities ("Rehab Properties") and to build new facilities ("New Properties"). Except as indicated below, under the provisions of the Act, a local governmental unit (i.e., a city, village or township) may establish plant rehabilitation districts, industrial development districts, and offer industrial firms certain property tax incentives or abatements to encourage restoration or replacement of obsolete facilities and to attract new facilities to the area.

An industrial facilities exemption certificate granted under the Act entitles an eligible facility to exemption from Ad Valorem Taxes for a period of up to 12 years. In lieu of Ad Valorem Taxes, the eligible facility will pay an industrial facilities tax (the "IFT Tax"). For properties granted tax abatement under Act 198 there exists a separate tax roll referred to as the industrial facilities tax roll (the "IFT Tax Roll"). The IFT Tax for an obsolete facility which is being restored or replaced is determined in exactly the same manner as the Ad Valorem Tax; the important difference being that the value of the property remains at the SEV level prior to the improvements even though the restoration or replacement substantially increases the value of the facility. For a new facility the IFT Tax is also determined the same as the Ad Valorem Tax but instead of using the total mills levied as Ad Valorem Taxes, a lower millage rate is applied. For abatements granted prior to 1994, this millage rate equals 1/2 of all tax rates levied by other than the state and local school district for operating

⁽²⁾ Based on the City's 2000 Census of 45,255.

purposes plus 1/2 of the 1993 rate levied by the local school district for operating purposes. For abatements granted after 1994, this millage rate equals 1/2 of all tax rates levied by other than the State plus none, 1/2 or all of the state tax rate (as determined by the State Treasurer).

The City has established goals, objectives and procedures to provide the opportunity for industrial and commercial development and expansion. Since 1974, the City has approved a number of applications for local property tax relief for industrial firms. Most abatements have been for new industrial facilities. The SEV of properties which have been granted tax abatement under the Act 198, removed from the Ad Valorem Tax Roll and placed on the IFT Tax Roll totaled \$87,194,518 for the fiscal year ending June 30, 2008. The IFT Taxes paid on these properties is equivalent to Ad Valorem Taxes paid on \$43,497,259 of Taxable Value at the full tax rate (the "Equivalent Taxable Value"). Upon expiration of the industrial facilities exemption certificates the current equalized valuation of the abated properties will return to the Ad Valorem Tax Roll as Taxable Value.

The City's SEV and Taxable Value includes the value of qualified property located within the City's Tool & Die Renaissance Zone (the "Zone") which was created pursuant to the provisions of Act 376, Public Acts of Michigan, 1996 ("Act 376"), as amended. Act 376 was designed to stimulate private investment within the Zone through the abatement of certain property, income and business taxes. For the fiscal year ending June 30, 2008, the SEV and equivalent Taxable Value of property qualified for the benefits of the Zone program totaled \$9,204,900 and \$8,633,427, respectively.

⁽¹⁾ Principal Residence means a dwelling or unit in a multiple-unit dwelling subject to ad valorem property taxes that is owned and occupied as a principal residence by the owner of the dwelling or unit. Principal residence includes all unoccupied property classified as agricultural adjacent and contiguous to the home of the owner that is not leased or rented by the owner to another person if the gross receipts of the agricultural or horticultural operations, if any, exceed the household income of the owner. If the gross receipts of the agricultural or horticultural operations do not exceed the household income of the owner, the homestead includes only 5 acres adjacent and contiguous to the home of the owner. Principal residence includes a life care facility registered under the living care disclosure act, Act No. 440 of the Public Acts of 1976, being sections 554.801 to 554.844 of the Michigan Compiled Laws. Principal residence also includes property owned by a cooperative housing corporation and occupied as a principal residence by tenant stockholders. Non-principal residence is property not included in the above definition.

Source: City of Kentwood

⁽²⁾ The Kentwood Public Schools is the largest school district within the City. Portions of other school districts overlap the City's boundaries. The lowest and highest non-principal residence millage rates for the other overlapping school districts for the fiscal year ending June 30, 2007 ranged from \$23.5000 to \$25.3000 for each \$1,000 of Taxable Value, respectively. The total tax rates for property owners in other school districts would change accordingly.

⁽³⁾ Overlapping debt is the portion of another taxing unit's debt for which property taxpayers of the City are liable in addition to debt issued by the City.

December 10, 2007

To the City Commission of the City of Kentwood Kentwood, Michigan

We have audited the financial statements of City of Kentwood for the year ended June 30, 2007, and have issued our report thereon dated December 10, 2007. Professional standards require that we provide you with the following information related to our audit.

Our Responsibility Under Auditing Standards Generally Accepted in the United States of America and Government Auditing Standards

As stated in our engagement letter dated July 20, 2007, our responsibility, as described by professional standards, is to plan and perform our audit to obtain reasonable, but not absolute, assurance that the financial statements are free of material misstatement and are fairly presented in accordance with accounting principles generally accepted in the United States of America. Because an audit is designed to provide reasonable, but not absolute assurance and because we did not perform a detailed examination of all transactions, there is a risk that material misstatements may exist and not be detected by us.

As part of our audit, we considered the internal control of the City of Kentwood. Such considerations were solely for the purpose of determining our audit procedures and not to provide any assurance concerning such internal control.

As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of the City of Kentwood's compliance with certain provisions of laws, regulations, contracts, and grants. However, the objective of our tests was not to provide an opinion on compliance with such provisions.

Significant Accounting Policies

Management is responsible for the selection and use of appropriate accounting policies. In accordance with the terms of our engagement letter, we advised management about the appropriateness of accounting policies and their application. The significant accounting policies used by the City of Kentwood are described in Note 1 to the financial statements. No new accounting policies were adopted and the application of existing policies was not changed during the year. We noted no transactions entered into by the City of Kentwood during the year that were both significant and unusual, and of which, under professional standards, we are required to inform you, or transactions for which there is a lack of authoritative guidance or consensus.

Accounting Estimates

Accounting estimates are an integral part of the financial statements prepared by management and are based on management's knowledge and experience about past and current events and assumptions about future events. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ significantly from those expected. The most sensitive estimates affecting the financial statements were:

- Management's estimate of the useful lives of depreciable capital assets is based on the length of time it is believed that those assets will provide some economic benefit in the future.
- The transfers for accrued post retirement benefits have been estimated based on actuarial assumptions.

We evaluated the key factors assumptions used to develop these estimates in determining that they are reasonable in relation to the financial statements taken as a whole.

Audit Adjustments

For purposes of this letter, professional standards define an audit adjustment as a proposed correction of the financial statements that, in our judgment, may not have been detected except through our auditing procedures. An audit adjustment may or may not indicate matters that could have a significant effect on the City of Kentwood's financial reporting process (that is, cause future financial statements to be materially misstated). In our judgment, none of the adjustments we proposed, whether recorded or unrecorded by the City of Kentwood, either individually or in the aggregate, indicate matters that could have a significant effect on the City of Kentwood's financial reporting process.

Disagreements with Management

For purposes of this letter, professional standards define a disagreement with management as a matter, whether or not resolved to our satisfaction, concerning a financial accounting, reporting, or auditing matter that could be significant to the financial statements or the auditor's report. We are pleased to report that no such disagreements arose during the course of our audit.

Consultations with Other Independent Accountants

In some cases, management may decide to consult with other accountants about auditing and accounting matters, similar to obtaining a "second opinion" on certain situations. If a consultation involves application of an accounting principle to the governmental unit's financial statements or a determination of the type of auditor's opinion that may be expressed on those statements, our professional standards require the consulting accountant to check with us to determine that the consultant has all the relevant facts. To our knowledge, there were no such consultations with other accountants.

Issues Discussed Prior to Retention of Independent Auditors

We generally discuss a variety of matters, including the application of accounting principles and auditing standards, with management each year prior to retention as the City of Kentwood's auditors. However, these discussions occurred in the normal course of our professional relationship and our responses were not a condition to our retention.

Difficulties Encountered in Performing the Audit

We encountered no difficulties in dealing with management in performing our audit.

This letter and the accompanying memorandum are intended for the use of the City Commission, management, and federal awarding agencies and pass-through entities and is not intended to be and should not be used by anyone other than these specified parties.

Very truly yours,

Rehmann Johann

City of Kentwood

Comments and Recommendations

For the Year Ended June 30, 2007

In planning and performing our audit of the financial statements of the City of Kentwood as of and for the year ended June 30, 2007, in accordance with auditing standards generally accepted in the United States of America, we considered the City's internal control over financial reporting (internal control) as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the City's internal control. Accordingly, we do not express an opinion on the effectiveness of the City's internal control.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A significant deficiency is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the entity's financial statements that is more than inconsequential will not be prevented or detected by the entity's internal control.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the entity's internal control.

Our consideration of internal control was for the limited purpose described in the first paragraph and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control that we consider to be material weaknesses, as defined above.

Other Matters

Approval of Invoices Before Payment

In the past year the Local Audit and Finance Division (LAFD) of the State Treasurer's office has asked CPA firms auditing units of local government to disclose whether the board or council approves all invoices prior to payment. According to the guidance issued by the State, "all disbursements must be approved by the legislative body prior to disbursement unless addressed otherwise in the charter. The legislative body may establish a formal policy to authorize payments prior to approval to avoid finance or late charges and to pay appropriated amounts and payroll (including related payroll taxes and withholdings)." Management is aware of this new guidance, and is still working with the City Attorney to develop a plan to ensure compliance.

Accounting for Special Assessments

Over the years, the City has levied various "deferred" special assessments for which collection is delayed until certain conditions relating to property usage are met. In addition, certain assessments were initially levied to one taxpayer, with the understanding that a portion of the assessment would be subsequently levied to additional taxpayers and then refunded to the initial payer. The City uses the Special Assessment Deferred Payback Fund to account for amounts collected in this manner.

City of Kentwood

Comments and Recommendations

For the Year Ended June 30, 2007

During our audit, we noted that this fund currently contains a significant amount of resources that are being held pending identification of the appropriate entity to receive reimbursement for assessments previously paid. We understand that this balance has accumulated over the years due to difficulties in locating the appropriate taxpayer(s) to reimburse. We recommend that management invest sufficient time in the current year to research these accounts and either disburse the amounts, or escheat unidentifiable funds to the State.

Documentary Support of Journal Entries

During our audit, we noted several journal entries posted to the general ledger for which there was no signed approval to support authorization of the entries being made. As manual journal entries represent higher risk for circumventing otherwise solid internal controls, we recommend that all such entries require a signature or initial to provide evidence that the entry was reviewed by an appropriate administrator. We have noted that the journal entry function is segregated in such a way where an individual that creates a journal entry is independent of the actual posting to the general ledger.

Approval of payroll register prior to payment

During our audit, we noted that there is no supervisory approval of the payroll register prior to checks being issued. We noted in our review of internal controls over the payroll process that pay rates could be changed or employees could be added to the system without supervisory approval. If any inappropriate change were to occur, it might not be discovered on a timely basis. We recommend, possibly in conjunction with the City's implementation of the new accounting system for each payroll period, that a report be prepared for review by an administrator that lists all pay rate or employee changes made since the prior payroll period.
